DX/SWL/MEDIA PROGRAMS updated Sept 17
http://www.worldofradio.com/dxpgms.html

** ALGERIA [and non]. 13815, Sept 21 at 1817, NO signal from TDA via FRANCE as scheduled this hour, into African and Maryland SDRs. Ivo Ivanov, Bulgaria, who monitors a lot of TDA/RTA, found the Issoudun, FRANCE relays on 6050, 7295, 9535 between 04 and 06 UT Sept 21, also missing, but own site Béchar on air, 7200, 9450, but not Ouargla either. I often run across 9620 in my 06-07 UT monitoring but don`t log it. Inside-Algeria usage is very hit-and-miss, but presumably the France relays are soon to stop, if not already. See
http://hfcc.org/data/schedbybrc.php?seas=A22&broadc=TDA
including: HFCC schedule for TDA via ISSoudun, FRANCE:

04-05 6050
05-06 7295 9535
06-07 9620
18-19 13815
19-20 11985 12060
20-21 9510 9660
21-22 5930 9585
22-23 5930
(Glenn Hauser, OK, WOR)

** ALGERIA [non]. 11985 & 12060, Sept 21 at 1907, still no signals from scheduled TDA relays via FRANCE, checking SDRs in Africa and Maryland (Glenn Hauser, OK, WOR)

** ANTARCTICA. 15475.98 RC USB, Sept 17 from 1440 into Argentine SDR, nothing until *1453, LRA36 cuts on with VG signal during song, and another before 1500.6 usual sign-on routine I`ve detailed many times before, 1502 Esperanza themesong; 1505.6 brief poetic discourse; 1506.7 percussive song; 1511 ID and `live` YLs into the 20th or 21st program of the season, something about Día del Maestro and school #38? at the base. Now I`m sure this is playback of Wed Sept 14 show and altho I might garner a few more details this time, I am about to quit -- just when, after geo coördinates are cited, it dumps off the air already at 1513.6*. Still off at 1540 and typically not expected to resume (Glenn Hauser, OK, WOR)

** ANTARCTICA. 15475.98 RC USB, Wednesday September 21, a good thing I tune in Argentine SDR early, for at 1431, LRA36 is already on with rockmusic, peaking S7. Gary Pence says they started at 1428. 1436 official sign-on, 4-language advisory, staff names; 1438 Esperanza themesong; 1441 poetic recitation; 1443 song about primavera: they are already celebrating spring tho no equinox really until UT Sept 23 at 0103, or 0104 depending on which reference. 1447 ``su compañía`` ID

and into live YL chat, on 22nd program of the 2022 cycle; a ``día muy especial``. Guests in studio, chicos from the secondary school; 1450 male voice gets to read history of base; weather hard to copy, but maybe minus 5 and winds 55 kph; 1453 phone numbers and all the other contact info; acknowledges someone from Jujuy and callers on the air; 1455.5 music under up to full; 1501 student talking about history; lots more chat I don`t try to copy, 1525 song; 1545 primavera song; 1604 ID with staff names again, ``nos une`` and off. But 1606 back on for a few seconds of song, off again and no more by 1631 when the SDR times out again (Glenn Hauser, OK, WOR)

** BRAZIL. 15189.89 approx., Sept 19 at 2353, JBA S2/S3 Portuguese, obviously the always off-frequency and always very weak only ZY left active on 19m, R. Inconfidência, Belo Horizonte (Glenn Hauser, OK, WOR)

** CANADA. 248 kHz MCW, Sept 21 at 0624 UT, dash and WG, 1000 watt ND beacon at Winnipeg MB. Audible despite storm noise from Kansas, and little else. Will certainly miss WG when decommissioned April 20, 2023, per August CIDX Messenger; however not flagged as such in dxinfocentre.com beacon list (Glenn Hauser, OK, WOR)

** CANADA [and non]. 1010, CFRB, reply from Karl Zuk to my reports:

``Hello Glenn: Regarding CFRB 1010 --- I live 45 miles due north of New York City and WINS is supposed to be a dominant 50 kW signal. I am supposed to be within the WINS nighttime primary coverage area. CFRB and WINS battle each other every night - Always have - Always will. I can usually null both of them apart to listen, but this can't be done with an omni-directional car radio.

Why this allocation was ever permitted, I don't know. As far as I can tell, CFRB simply stays on day pattern 24/7. For all intents and purpose - especially for casual listeners - no one would seriously listen to this maniacal mix.

I have a family home in Central Michigan near Bad Axe. Here it is CFRB dominant on 1010 days. At night, if you listen carefully and null - it is not hard to log WINS underneath CFRB. They should be thought of as the Gemini twins of 1010 kHz. What fun.

What I miss is WINS HD Radio. It was a fun experience when WINS used to lock in with HD digital. All the co-channel scramble would instantly disappear - leaving WINS in the clear and hi-fi - but it rarely held on for any amount of time - day or night. Thanks for listening - Karl Zuk`` (Glenn Hauser, OK, WOR)

** CANADA. 1010, CFRB Toronto: further discussion to my logs:

``Richard Lacroix, somewhere in Canada: ``Not entirely correct with regards to the CFRB 1010 pattern.
https://en.wikipedia.org/wiki/CFRB
https://radio-locator.com/cgi-bin/finder?sr=Y&s=C&call=CFRB&nav=home
The station does have a day and night time pattern. The only difference is that it is a 50 kW day and night "clear channel station" (Class A). Operations began in 1927. The towers are all but a few miles away from Lake Ontario and as such have a clear unobstructed path.``

gh: ``You do not explain how the day and night patterns differ. Take a look at them via radio-locator.
https://radio-locator.com/cgi-bin/pat?call=CFRB&service=AM&s=F&h=D
https://radio-locator.com/cgi-bin/pat?call=CFRB&service=AM&s=F&h=N

``Night pattern has a null toward WINS, day pattern does not. Mr Zuk near NYC says CFRB interference is intolerable at night, therefore concludes day pattern is in use. What a station axually does, not necessarily correlates with they are licensed/supposed to do. Glenn``

Andy Reid: ``In Peterborough, ON, Newstalk 1010 is totally unlistenable after dark because of WINS. 1010 was (is?) a Canadian clear channel. I read in the past that WINS had to seek special permission to use the frequency. It should never have been allowed if that was the case.`` (Glenn Hauser, OK, WOR)

** CANADA. 2598 USB, Sept 15 at 0643 UT, ``no gale warnings``, VP and off, from one of the Canadian CG stations in Newfoundland or vicinity, but trouble is none scheduled at this overnight gap hour in https://dxinfocentre.com/mb.htm under Met Area 4 -- unless it`s VCP4, 3000 watts from Placentia, scheduled at 0737, but maybe that means during standard time so a real hour earlier during DST? Anyhow glad to be hearing something here again after a long noisy summer, now abating somewhat. Checked 2749 USB first but nothing there: from Nova Scotia area, usually better closer signals (Glenn Hauser, OK, WOR)

** CANADA. 6754 USB, Sept 15 at 0626, CHR Trenton Military, still the same set of ``No Report Received`` as much earlier on 15034 USB --- looping that for hours and hours? At 0628 UT cited time as ``0625 zulu``! Then NRRs from: Comox, Victoria, Vancouver, Shearwater(? maybe misheard as that`s Halifax). Fortunately we still have Gander funxioning properly with same announcer, broader non-military airports on 6604 USB.

15034 USB, Sept 15 at 1445, Trenton finally working with reports from Greenwood, Gander... (Glenn Hauser, OK, WOR)

** CHINA. 13530, Sept 15 at 1449, Chinese S5 vs CODAR S9 peaks, i.e. CNR1 jammer against Sound of Hope. Also weaker S4/S5 on 13130 & 13020, the usual trio. This time I patrol all WOOB ranges between 7.9 and 16.1 MHz and do not hear a single other one, not even as JBA carrier. Get with it, ChiCom! (Glenn Hauser, OK, WOR)

** CHINA [and non]. 13809.946, Sept 17 at 1525, two signals few Hz apart making a LAH, the stronger one in Chinese, likely the CNR1 jammer vs RFA Mandarin via TAJIKISTAN scheduled this bihour (Glenn Hauser, OK, WOR)

** CUBA. 6140, Sept 15 at 0632, JBA carrier, no doubt leapfrog mixing product of RHC English 6060 over 6100 another 40 kHz beyond. 6060 is S9+10/20 undermodulated, 6100 is S9+20/30 with only a trace of modulation. Nothing detected on 6020 for reverse leap.

6230, Sept 15 at 0635, RHC English JBA on leapfrog mixing product of 6100 over 6165 another 65 kHz beyond; 6165 is S9+30. 6035, JBA carrier, which would be reverse leap of 6165 over 6100 another 65 kHz below.

5955, Sept 15 at 0637, JBA carrier, which would be leapfrog mixing product of 6165 over 6060 another 105 kHz beyond. Nothing detected on 6270 which would be revere leap of that. All this is happening at Bauta site. 6000, if it were still on, would not be participating as it`s from Quivicán. The Other Side:

``Cuba left off the list of suggested tourism destinations
Varadero was chosen as the world's second most 'ideal beach', but did not even appear as a recommended travel destination.
Roberto Álvarez Quiñones, Miami 12 Sep 2022 - 19:01 CEST`` ...
https://diariodecuba.com/economia/1663002060_42186.html
(Glenn Hauser, OK, WOR)

** CUBA. 5040, 6000 & 6165, Sept 16 at 0617, all these RHC English are off already; 6140 with JBA carrier leapfrog mixing product of 6060 over 6100; while 6100 itself is S9+10 and JBM in Spanish! 6060 the only English, S9+20/30 with hum. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 13700, Sept 16 at 1436, RHC Spanish S9+10/20, VG modulation but NO spurblobs +/- 70v kHz now, nor any heard for many weeks in almost daily chex. In fairness I point out that in this case, nothing`s wrong with RHC. But I`m sure they`ll appear again sometime (Glenn Hauser, OK, WOR)

** CUBA. 5025, Sept 16 at 2344, R. Rebelde is off, tsk2, the #1 domestic network of The Revolution; good for Quillabamba, anyway if on

and can be pulled, nothing heard now. Something`s always wrong at RadioCuba. 5040 RHC stays on (Glenn Hauser, OK, WOR)

** CUBA. 9657.9 & 9642.1, Sept 16 at 2348, suspicious JBA carriers, both exactly 7.9 kHz from S9+35 9650 RHC, therefore surely spurs from that. Yay! Whee! Not every day one discover a new RHC spur setup. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6165, Sept 17 at 0611, only RHC English still on this band`s air, VG S9+30, but also 5040 S9+20/30 slightly distorted overmodulation; about the ILO`s position on slavery. Natch, DentroCubans under the yoke of Commie tyranny are not considered slaves. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6100, Sept 18 at 0637, RHC English is S9 of dead air; 6165 S9+10/20 just barely modulated = JBM; 6060 S9 and undermodulated, only usable channel, 5040 off while 5025 Rebelde is on. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6000, Sept 18 at 0632, this RHC English is unusually still on, along with 6100, 6165; but 6060, 5040 are off. Each night, each hour, a different random combination? Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11880, Sept 19 at 2347, RHC S7/S9 but JBM barely recognizable as English, with big hum. NOT // 5040 as scheduled this hour only, well modulated, loud music, Spanish // 11760 etc. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6100, Sept 20 at 0632, RHC English at S9+10/20 of just barely modulation; 6165, 6000 and 5040 are off, leaving only 6060 with a sufficient S9/+10 signal yet undermodulated with hum. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6165, Sept 21 at 0610, RHC English S9+30/40 direct, // only 5040 S9+20; all others off already: 6100, 6060, 6000, as well as 5025 Rebelde. Something`s always wrong at RHC. The Other Side:

``Economy --- Investing in Cuba: Certain Suicide --- What is behind the announcements that private investment on the island will be allowed? Emilio Morales, Miami 20 Sep 2022 - 17:42 CEST

In a desperate attempt to survive the multisystemic crisis that is about to topple it, the Cuban regime has taken a series of steps that, rather than a strategy, seem like acrobatics. Its new plan does not include the first thing that should be implemented in the economic sphere: a series of reforms, based on free enterprise and free markets, to restructure the model.

Yes, the regime has announced that it will allow investments in the private sector, and so has the Biden Administration, as part of its policy to empower the Cuban people by allowing investments by American companies together with private companies on the Island. However, it is naïve to think that there is a real private sector in Cuba...`` https://diariodecuba.com/economia/1663688577_42358.html (Glenn Hauser, OK, WOR)

** EGYPT. 9439.995, Sept 16 at 2144 & 2200 chex via UTwente, NO signal in English from Cairo. NO loss, either (Glenn Hauser, OK, WOR)

** EGYPT. 9439.995, Sept 19 at 2129, NO signal from R. Cairo, English into UTwente. Something`s amiss at Abis (Glenn Hauser, OK, WOR)

** EGYPT. 9439.995, Sept 20 at 2152, R. Cairo manages to get on air, but S9+25/35 into UTwente of hum and extreme distortion in presumed English. Something`s always egregious in Egypt (Glenn Hauser, OK, WOR)

** EGYPT. 9439.995, Sept 21 at 2204, R. Cairo is on today, S9+25 into UTwente, but extremely distorted modulation, useless. This protracted incompetence at National Media Authority is really remarkable. Something`s always egregious in Egypt (Glenn Hauser, OK, WOR)

** GUAM. 11590, Sept 16 at 1442, good S7/S9 signal in Turkic language with Russian influence, tnx to keywords ``radyosu`` and ``kiloGertz``. Conveying contact info with P O Box in HK?, some letters pronounced in English, eventually ``TWR``. Uplooked later, it`s KTWR in Kazakh at 1430-1445 daily with ``Do You Know`` program per Aoki; follows Uighur at 1400-1430 Mon-Thu only. WRTH files TWR Asia under SINGAPORE. Kazakh in HFCC as 250 kW at 305 degrees, way offbeam thisaway (Glenn Hauser, OK, WOR)

** INTERNATIONAL ATMOSPHERE [non]. News of hurricane Fiona hitting PR, blacking out entire island, leads me to the Hurricane Watch Net on 14325 USB, via Boca Ratón FL SDR: NCS heard at 1956 is N2PRD. Sept 18 at 2043, current NCS W2NNU.

Apparently changes NCS each hour? At 2100 it`s K5WAN declaring that this is a ``directed net`, i.e., follow the orders of the NCS. Reads latest warnings from National Hurricane Center in Miami: seemingly repeating every few minutes, or maybe with slight updating. Too much else is going on Sunday afternoons for me to render this my undivided attention. Periodically calls for anyone from PR or vicinity to check in but never heard any. Is that a positive or negative result? Glad SDR has squelch, never needed for broadcast monitoring. 2205, partial NCS call as --WCN. 2306 fluent but slightly accented Spanish versions

of NHC notices. Not much heard later, maybe net QSY to 40m by 0000? 7268 LSB, not checked. Call-area numbers no longer mean anything:

https://www.qrz.com/db/K5WAN
Says he is former storm tracker for KOTV 6 Tulsa

Next day, Mon Sept 19 by 2330, no activity on 14325 despite Fiona still churning from DR to T&C; how about HWN on 7268-LSB? Very active at 2340, but some other net as if they own the frequency, ``3905 Century Club`` ``for WAS and DX records``. NCS ending in -GWS taking numerous check-ins and greets them by handle; net not formally starting until 2400 (Glenn Hauser, OK, WOR)

** IRAN. 9640, Sept 16 at 1450, S5/S7 in Arabic as I recognize a key phrase. Listed is VIRI in Arabic from Sirjan at 1430-1730. HFCC shows 500 kW at 216 degrees for CIRAF 39 = Sa`udi Arabia. Long path? Way offbeam either way to here (Glenn Hauser, OK, WOR)

** KIRITIMATI. 846, Sept 16 at 0638, JBA carrier from R. Kiribati (Glenn Hauser, OK, WOR)

** KIRITIMATI. 846 kHz, Sept 18 at 0712, not even a JBA carrier from R. Kiribati, presumed regular Sunday night silence (Glenn Hauser, OK, WOR)

** KIRITIMATI. 846 kHz, Sept 19 at 0626, JBA carrier from R. Kiribati, resumed Monday after silent Sunday. Shows what only 10 kW on MW can accomplish over 4500 miles, if only on a clear frequency, audible just about every night (Glenn Hauser, OK, WOR)

** KIRITIMATI. 846 kHz, Sept 20 at 0630, JBA carrier from R. Kiribati.

Gary Pence, TX, has also been checking this via remote:

``Hi Glenn, I was using SDR NH6XO, Kaneohe, Hawaii when I caught them in their local sunset enhancement, better waterfall with visible audio besides the usual JBA carrier then it took a deeper fade that seems to be common that I have run across in my MW DXing. I Recorded a little and no side splatter directly on the sides, around 0428z Sept 20, 2022. Every time I have checked 846, a thin line showed up on the Kiwi, so to my amazement I was surprised to see some modulation in the waterfall and could hear it a little better. After about 10 minutes, the big fade hit. To really explore this sunset enhancement, I need to start listening just before sunset around 0345z or sooner until their sunset around 0428z. I read a story how somebody in Hawaii had armchair copy from across the room back in the day. CuL, Gary`` (Glenn Hauser, OK, WOR)

** MADAGASCAR. As we are almost out of summer, I wondered whether there could still be any DX propagation in the middle of our night on 16 m? Yes, the two OSOB Talata relay frequencies as better heard previously, which have a large trans-equatorial advantage.

17790, Sept 15 at 0621, JBA S5/S6, i.e. AWR French 0600-0630; and: 17530.024, Sept 15 at 0622, JBA carrier offset as usual, i.e. BBCWS in English, 0600-0800 (Glenn Hauser, OK, WOR)

** NIGERIA. 7255-, Sept 15 at 0630 direct, VON is off again/still.

[and non] 7255 minus 67 Hz = 7254.933, Sept 15 at 1724 into Canary SDR, VON is on in English, S8/S9 but VP in noise. 1801 recheck is off leaving VP S5/S6 music only +002 Hz, i.e. Xizang PBS, ChiCom-occupied TIBET, scheduled until 1805: and yes, cuts off at 1805*. Still no VON at 1830 (Glenn Hauser, OK, WOR)

** NIGERIA [non]. 7255-, Sept 16 at 0624, NO signal direct from VON. Nor Sept 16 at 1718-1755+ into Canary SDR, only JBA nearly on-frequency, no doubt ChiCom-occupied TIBET (Glenn Hauser, OK, WOR)

** NIGERIA [non]. 7255-, Sept 17 at 0605, VON still AWOL; how about alternates? 9690 nil; 11769.16V JBA carrier probably local birdie further down than VON would be. Are they totally inactive again?:

7255, Sept 17 at 1749, no signal into Canary SDR, just trace of imperialist ChiCom-occupied Tibet. 9690 nothing except ACI splatter from CRI listed on both sides; 11770 strong in Chinese, i.e. PBS Xinjiang, Urumqi in imperialist ChiCom-occupied East Turkistan, land of genocide against Uyghurs and other Moslems (Glenn Hauser, OK, WOR)

** NIGERIA [and non]. 7255-, Sept 19 at 0641, again NO signal from

VON, but not totally inactive:

7254.933, Sept 19 at 1730 into Canary SDR, signature offset VON carrier is on at S7/9+5, but mostly squeal with trace of unreadable programodulation, and 2ACI from much stronger 7265, CRI Russian via Urumqi, East Turkistan, std denunciation, 1732 with horse clip/clop SFX in dramatic narration, maybe about Mongols conquering Europe? Watch out. 7255- totally off by 1743 (Glenn Hauser, OK, WOR)

** NIGERIA. 7255-, Sept 20 at 0631, VON on with S9/+10 of dead air. Well, that`s something, awkward at Abuja. Did not get to check their evening today (Glenn Hauser, OK, WOR)

** NIGERIA. 7255-, Sept 21 at 0606, VON is OFF. Something`s always abnormal at Abuja.

7254.93v, Sept 21 at 1732 and still 1811, Alicante, Spain SDR gets a signal here at VON`s offset, but no modulation. Canary, Spain, SDR is unavailable as its ham must be transmitting (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6955 USB, Sept 16 at 2343, only pirate now with rock music, S5 vs S7 storm crashes, ``smoke another cigarette`` is also off-putting; music thru TOH into Sept 17, no ID then. Still on at 0044 vs HSNL, and past 0137, not necessarily single station with all those gaps. Yes, R. Free Whatever per many reports here: https://www.hfunderground.com/board/index.php/topic,101973.0.html ranging from *2259 to 0206*; also link to livestream: https://radiofreewhatever.mixlr.com/
(Glenn Hauser, OK, WOR)

** OKLAHOMA [non]. 1120, Sept 15 at 0645 UT, KMOX St Louis totally in the clear, no KETU daytimer Spanish CCI tonight (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1600, Sept 21 at 2120 UT, looking for some tolerable AM band music to nap by, I try KUSH in Cushing, but there`s a talk show instead! Seems to be MOR, not Biden-bashing like everything else in OK. 2129 still ID as ``Oklahoma`s Americana Station`` and 2130 back to Bloomberg Radio, ``Sound Off`` show, giving its frequencies in some major markets, 99.1, 1130, 106.1, 960, and Sirius XM 119, but no mention of 1600 or KUSH! NRC DX News of August 30 reported:

``KUSH OK Cushing – Format to C&W (ex-C&W/OLD) (StIntel)`` -- The `OLD` was ``Americana``, a rather rare format which made KUSH worth some listening. New NRC AM Log showed slogan ``Oklahoma`s Americana Station``. U1 5000/70 watts, psra 500. Radio-locator says ``Oklahoma`s Only Americana Station``, day coverage map finds OKC, Tulsa and Enid all between its ``distant`` and ``fringe`` contours, but I doubt it

have much of an audience in our three metros.

https://www.1600kush.com/ --- take your pick of slogans and formats, including Bloomberg Radio. Like far too many radio stations, there seems to be no plain old program schedule showing what`s on air, when, hour by hour (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 27184.4 AM, Sept 16 at 2354 UT, Enid CB pirate still relaying // 95.7 KXLS ``Lahoma`` undermmodulatedly but steadily S9+7, now as they are just starting coverage of a local stupid ballgame; it`s Friday evening, after all.

27184.5 AM, Sept 17 at 1530 check, on again with same station relayed into a SWBC, only S9 on another receiver (Glenn Hauser, OK, WOR)

** ROMANIA. 9700, Sept 18 at 2356, RRI IS S7/9+10 into Boca FL SDR until 2357.6*, so presumably my unID OC, 48+ hours ago, concluding RRI Spanish hour via Tsiganeshti. People keep misspelling it ``Tiganesti`` without the necessary diacritix for which I substitute fonetikaly thus (Glenn Hauser, OK, WOR)

** SOUTH CAROLINA [non]. 9980, Sept 16 at 1453, blasting S9+20/30 signal from WWCR-4 with really nice bluegrass banjo hymn about Calvary. I axually pause to listen to TOMBS for a change, followed by another bluegrass thru ToH with no talk at all except WWCR ID overlay. Not sure it`s really TOMBS, but seems // VP 9455 WRMI never synchronized. 9980 is almost 100% TOMBS at 1200-2400 except for `Financial Survival` M-F at 20-21. Make that: 94% (Glenn Hauser, OK, WOR)

** SPAIN. 17855, Fri Sept 16 at 2200, token English from REE previews feature after news to be interview with someone from a fancy hotel in Madrid known for hosting celebs. Pass. Anyway, VG into Maryland SDR so other frequencies not explored either.

17855, Sat Sept 17 at 1529, REE is on much earlier weekends, only S9/+10 with silly ballgame (Glenn Hauser, OK, WOR)

** SPAIN. 17855, Monday Sept 19 at 2200, token English from REE. News with Amy, too much sports with Hélena; 2211 Justin introduces a 15-minute book-launching talk in 2020y by Carissa Véliz of Prihvacy is Power, as in: https://www.carissaveliz.com/books VG into Maryland SDR and other three also audible, 15520, 11940, 11670 (Glenn Hauser, OK, WOR)

** SUDAN SOUTH [non]. 15150.019, Sept 17 at 1518 uncertain language, S7/S9 and soon mentions Turkey? But this hour is R. Tamazuj from Netherlands via MADAGASCAR, presumably in Juba Arabic dialect. Much

greater signal than 15140 RHC. Nearby single-hop propagation degraded and/or underpowered (Glenn Hauser, OK, WOR)

** TURKEY. 9830.003, VOT S9+25/35 into UTwente, usual `hard` news, commentary, press review at first, finally 2220 Sept 16 always enjoyable Tuerkiyeish music. 2225 `Feeling Supreme` subtitle now sounds like ``healing spring``?? A repeat about natural remedies for head lice, starting with mixing vinegar and water in a bowel --- I think he means bowl? Heh heh, often good for unintentional ESL humour. Something`s always awry at Ankara (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 9830, Sept 17 at 2300, Die Stimme Türkiye opening spurious German hour after IS and TS, not turned off after Englisch; alleges 15350 which is the real frequency for German at 1130; also at 1730 on 9840. Sleepyop awakens and turns it off already at 2307*. Was S9+55! into UTwente, and there remains a very weak JBA AM sync also at +003 Hz, i.e. CNR1 Beijing site scheduled until 0100. Also uncovers RTTY warble from NAU PR on USB only. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 9830.007, Sept 19 at 2223, VOT English, VG S9+45 into UTwente only a very light squeal, amid `Feeling Supreme` with teas to drink countering diabetic insulin resistance. After some music, 2353 std s/off with schedule, a bit of IS to 2355*, no extra German (Glenn Hauser, OK, WOR)

** TURKEY. 15375, Sept 20 at 1454, S8/S9 of heavy rock vocal music, Turkish talk and more music past 1500, one of better signals on band, so I bet it`s VOT: yes, 13-16, 500 kW at 310 degrees toward W Europe and here are we beyond (Glenn Hauser, OK, WOR)

** TURKEY. 9830.021, Sept 20 at 2154, VOT already on in Tuerkiyeish talk not scheduled now, S9+45 into UTwente, 2155 IS starts with Engliyeish IDs, but suptorted and with loud hum, 2220 commentary about QE2 by someone with an Engliyeish name. Suspect same transmitter as for Tuerkiyeish at 16-21 on same parameters 500 kW at 310 degrees USward. Wonder if it stayed on after 2100. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 9830.002+, Sept 21 at 2202, VOT English at S9+45 but just barely modulated: I have to run UTwente volume at max, a risk if tuning to anything else, and also local volume at max, just to hear it at ``normal`` level. 2215 `Review of the Tuerkiyeish Press`; 2344 `Feeling Supreme` repeat about natural remedies for diabetic/insulin problems. Does not go off circa 2255, but IS, 2300 TS and opening extra German airing while the sleepyops doze. News, 2314 song; 2334 multi-lingual ID reel, still going past 2344 song. By now mod level better, can back off a bit, but still under-. 2347 `DYKT` theme and

German version, something about a tower.
Double bonus! Stays on after German too with IS and 2356
Luso-Portuguese IDs, UT Sept 22 *0000 sign-on for another broadcast
not supposed to be on SW at all. I quickly notify the radioescutas io
group that brasileiros are in luck tonight! Sign-on only heard giving
satellite parameters. Too busy to listen closely but usual mix of talk
features and Turkish music, still 0043; 0053 IS and finally cut off
the air as if this were an intentional emission. Bet it won`t be on
tomorrow, but sporadically (Glenn Hauser, OK, WOR)

** UKRAINE. (7730), UR1 via WRMI circa 0500, `Ukraine: Security Issue`
as copied later from archive:

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_12_09_22.mp3
For Sept 12 = day 200 of war, including: drove out occupiers from over
20 settlements. Freeing area double the size of greater London since
last Wed. Z not ready to nego with Putin. World feared R Fed, not any
more, lots of weapons provided. Germany and France earlier made
mistake inviting R to participate in Europe. Thousands would have been
saved if U were armed earlier. Appeasement does not work. Integration
of U into NATO and EU must be fast-tracked. Europe prepared to enter
heating season without serious issues. R earning more on energy than
spending on war, 160 vs 100 gigadollars. 53% of German citizens
willing to sacrifice more. Nine ships left Odesa ports with grain. 122
total have left U for abroad. R deporting Us to far parts of R.

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_13_09_22.mp3
For Sept 13 over 9 minutes, longest yet. No date or warday stamp. km
retaken from R control. Z believes U will defend to the end. Interview
with Fareed Zakaria. Zap NPP final reactor 6 shut down reducing risk
of nuke disaster but still high. Zone must be demilitarized. Fallout
cloud could reach neighboring countries. R incapable of fighting on
battlefield, rather vs civilians. R sending missiles to destroy
civilian infrastruxure, cowardly. Estonian PM says warcrime by R.
Liberated territories being cleaned up after war crimes, tortured
bodies discovered. Kherson, R seized two hotels, burglarized houses. U
intends to seek $300 blllion resparatons from R, not enough. Any R
gold and foreign exchange reserves should be handed over to U.
International agreements needed to allow this thru other countries. U
war stories game developed.

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_14_09_22.mp3
For Sept 14, no date or day cited. Z says R behaves like international
terrorist. At least 1000 citizens killed in city near Kharkov during R
occupation. Hope not as bad as Bucha. Women tortured electrically.
Appeal to mothers of the world to rise up against Putin. Need more
military aid from international partners. R violates all intermational
conventions in treatment of U POWs. R violates norms of Geneva

Convention. Amnesty International in scandal, whitewash R genocide against U (Glenn Hauser, OK, WOR)

** UKRAINE. (7730), UR1 via WRMI at 0500 `Ukraine: Security Issue`: http://ukr.radio/images/ckeditor/files/files/ENG_NEWS_15_09_22.mp3

For Sept 15, 8+ minutes, date and warday not cited, including: Pres Z visited liberated city of Izium. Prosecutors sending investigators of war crimes. Will be tribunal. R aggressors cannot establish services necessary to life in occupied areas. War crime cases documented from words of witnesses and victims. Fate of many unknown. Tortures with electric current, women sleeping on floor, wires to hidden cameras found. Rocket attax on Z`s hometown. 8 cruise missiles destroyed dam. Houses floooded. International partners should help. Time to strike final blow against Evil Empire. Numbers of U children killed and injured. Feature film about Bucha Feb-April. Citizen of Kazakhstan helped. World should know aboout this genocide. Starts shooting in Dec.

Webpage says [sic: russia does not deserve to be capitalized]: ``Actual news about the russian-Ukrainian war. Every day, Ukrainian Radio prepares a digest of the most important news about the russian-Ukrainian war in the format of short podcast. We offer only reliable information from confirmed sources: reports on the course of the war, coverages from cities attacked by russia, as well as news about life in the home front regions of Ukraine. If you want to be aware of the situation in Ukraine, but do not have time to read the news all day – the “Ukraine: security issue” is for you.`` (Glenn Hauser, OK, WOR)

** UKRAINE. As of 1930 UT Sept 18, the latest `Ukraine: Security Issue` at http://www.nrcu.gov.ua/ua_security_issue is still dated 15.09. Forcing link changes to 16.09 and 17.09 get 404. Need to check whether still updated daily at 0500 on UR1 via WRMI 7730 (Glenn Hauser, OK, WOR)

** UKRAINE [non]. 7730, Sept 19 at 0500, WRMI starts UR1 relay as usual but all UU talk, no English `Ukraine: Security Issue` by when I quit at 0513, as latest editions also missing from podcasts. But Richard Langley replies at 1427 UT Sept 19:

``It is there now. As far as the airing on WRMI is concerned, I didn't do my usual Sunday evening recording of 7730 kHz as I'm in Denver this week for a conference, so have no confirmation if it aired then. However, I automatically record Radio Baltic Waves International on 1386 kHz each evening at midnight UTC using the U. Twente SDR receiver and my UNB desktop computer. "Ukraine: security issue" started at about 00:13 UTC today (19 September). It was the same edition as that

on the website for 18 September.``

So maybe started on WRMI just as I gave up. Now monitoring the last three issues. They are no longer announcing at the start the date or warday number:

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_16_09_22.mp3
For Sept 16: Over 9 minutes, including: IAEA demands R stop occupation of Zap. NPP. Up to 1000 dead in Izium, twice that of Bucha and other cities destroyed. Must exhume each body. R fired into Dnep. region, civilian targets, hydraulic struxures. Pres. of Euro Comm. visited, Pres Z spoke with her about reaxions to R terror. USA SOS Blinken also visited. More than 300 energy facilities destroyed in U, thermal power plants. High risers will have to evacuate with no heat. R attacked Z`s hometown to demoralise him. U understands what must be done. R tries to blow up international sanxions. R sent $300 million to other countries. R not understand U mentality, leading to its defeat. U people back the leadership. Only 8% favor giving up territory for peace.

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_17_09_22.mp3
For Sept 17, including: UN sending team to investigate war crimes, Izium tortured bodies. Must recognize R as terrorist state. Whole families buried, more than 400 so far exhumed. Civilians also died from cold, hunger. Baby spent most of life in basement. Survived on honey, cheese, mother`s milk. Illegal prison in another town, Kharkiv region. R war crimes everywhere. At least 389 U chilldren killed, 756 injured during war. Putin could withdraw troops with one phone call. Far from reality.

http://www.nrcu.gov.ua/images/ckeditor/files/files/ENG_NEWS_18_09_22.mp3
For Sept 18, YL with heavy accent, including: 59 bodies exhumed at Izium, civilian and military, evidence of torture. Will take at least two weeks. hashtag: #iziummassacre. Someone was ``electrocuted`` for 40 minutes, but apparently survived. R doing what Nazis did. Electric torture tools found in railway station. Defining genocide. R trying to destroy U identity. Major artist killed, was volunteer. Bit of a song. Neighboring countries say no land should be ceded. WaPo says EU funding to Hungary should be suspended (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2155 monitoring: confirmed UT Thursday September 15 at 0030 on WRMI 9395, S9+10/15 into Maryland SDR.

Also confirmed UT Thursday September 15 at 0130 on WRMI 5010, S7/S9 with storm crashes into Maryland SDR. A gospel huxter played right up until 0130 with no ID break, cut to WOR. Then checking into Bonaire SDR, better S9+5/15, but worse by 0150 with noise increase.

WOR 2156 should be ready for download early UT Friday September 16 and first SWBCs at 0130 on WRMIs 5850 & 7730. EXPECTED:

0300vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0430]
2000 UT Sunday IRRS 1323 & 918? & 207?-Italy
0030 UT Monday WRMI 7780 to SW
0300vUT Monday WBCQ Area 51 6160v to WSW
0030 UT Tuesday WRMI 9395 to NNW
2230 UT Tuesday WRMI 9955 to SSE [jammed by Cuba]
2330 UT Tuesday WRMI 9395 to NNW
1030 UT Wednesday WRMI 5850 to NW
2100 UT Wednesday WBCQ 7490v to WSW
0030 UT Thursday WRMI 9395 to NNW
0130 UT Thursday WRMI 5010 to S

Confirmed first SWBCs, UT Friday September 16 at 0130 on WRMIs, after gospel huxter cut off at 0129.5 for ID, and some beeps before WOR: 7730, S9+10/20; 5850, S9/S8 both into Maryland remote. Once again BBB steps on my last few words of closing at 0159, with two canned ID sequences in a row.

Also confirmed, UT Friday September 16 at 0330 on WRMI 7780, S9 but noisy into Maryland SDR, way off SW azimuth. But plays to conclusion without overlap at 0159.

Also confirmed Friday September 16 at 1430 on WRMI 9955, S8/9+10 direct, no jamming.

As expected on the third Friday of the month WOR confirmed NOT on IRRS

7290 or AM Italia 1323, at 1815 UT September 16. In past this hour has been pre-empted for `Station of the Cars` rock music -- never shown as such on the NEXUS-IBA program schedule -- but not this month. Missed start of show with name, monitoring via nearby Noale SDR, on 1323 but which also gets 7290 from Bulgaria, vs heavy storm noise around NE Italy, as always?? 918 kHz is not on this time. Feature Story News, UN News and various other filler fragments 1800-1815 & 1844-1900 are not on either this week.

At first, 1323 is way under Romania`s minority service in German. The IRRS show is some Christian discussion, pro-Jesus, anti-one-World, etc. Gives address in Troy MI 48007. 1831 Diabetes PSA from Ad Council involving reverse speaking; maybe changing sources now, mentions American Prospect, and ID for 90.1, WUSB Stony Brook, LINY, time as 6 pm Tuesday, music fill; 1842 `Off the Wall` starts, leftish political discussion by hackers, pre-primary or runoff of 8/23. See https://www.wusb.fm/node/15993 I suspect like so much other filltime, IRRS is just pulling programming off the web, perhaps without request or knowledge by the originators.

Meanwhile, UTwente is getting second harmonic 14580 better than usual, S5. 7290 cuts off at 1857*; 1323 seems still going with German QRM, 1859 ``IRRS Shortwave [sic] signing off`` and Verdi theme, in clear after 1900 tone from Romania and off. I`ve asked IRRS whether WOR will resume next Friday at 1815 (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2156 monitoring: confirmed Friday September 16 at 2030 on IRRS SW via AM Italia, 1323 kHz, S7 into Trieste SDR, S9/+10 into Wels, Austria, but noisier.

Also confirmed UT Saturday September 17 at 0400 on WBCQ Radio Angela, 5130 minus 25 Hz into Maryland SDR = 5129.975, S9+10.

Tim Gaynor says the Unique Radio, Australia, webcast if not SW broadcast of WOR at 0700 UT - and IRR at 0730 Saturdays, are now on Sundays at 0800 & 0830 UT. Since IRR is originally several hours later on Sundays, its initial UR airing would have to wait until Wed at 1130. Since WOR is originally on Thu, the Wed 1100 on UR would be almost a week old. And: ``Streaming on low bitrate AAC+ for a bit till I sort out a better internet connection and also the shortwave licenses will be transferred in due course.`` Next:

1930vUT Saturday WA0RCR 1860-AM
0030 UT Sunday WRMI 7780 to SW
0300vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0430]
0800 UT Sunday Unique Radio webcast [5035/3210 USB suspended]
2000 UT Sunday IRRS 1323 & 918? & 207?-Italy
0030 UT Monday WRMI 7780 to SW

0300vUT Monday WBCQ Area 51 6160v to WSW
0030 UT Tuesday WRMI 9395 to NNW
2230 UT Tuesday WRMI 9955 to SSE [jammed by Cuba]
2330 UT Tuesday WRMI 9395 to NNW

2100 UT Wednesday WBCQ 7490v to WSW
0030 UT Thursday WRMI 9395 to NNW
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A. WORLD OF RADIO 2156 monitoring: ``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard’s listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees, Dear Glenn:
World of Radio, monitoring and confirming the latest for #2155, #2156, 9955 kHz, listen creek fm/stream internet.

9/11, 21 years ago, Sunday, Sep 11, 2022. Friday evening, barbecue attended and restaurant Sunday evening, 60th Anniversary at CIDX gathering in Sherwood Park and Lamont, Sep 16-18, 2022. I had a spectacular time despite only nine or ten at the most showing up,

still great time seeing memory lane slide show, even seeing how much hair I had way back when. Interviews were recorded in the International Radio Report recent show, Richard. WRMI:

[2155:] 5850, QSB fading, jamming [??], moderate static, 0133, 0151 (55333-4), 0159, Sep 9 UTC 2022 [Fri]
9395, QRN, QSB fading, 0031, 0043, 0059 (45343), Sep 13 UTC [Tue]
5850, 1032 (55434), Sep 14 UTC 2022 [Wed]
9395, QSB fading, shockwave [??], 0030, 0043, 0058, 0059, Sep 15 [Thu]
[2156:] 5850, moderate static and jamming [??], 0130, 0137, 0144 (55344-3), 0159, Sep 16 UTC 2022 [Fri] (Lemke, Richard -AB)``

Confirmed Sunday September 18 at 2000 on IRRS via AM Italia, 1323 kHz, Villa Estense, Italy, S9+10/15 into nearby Noale SDR, atop understation of talk and music making a medium SAH. Is Romania still on? If not, that leaves Iran or Tanzania, even later into their nights. OR among the total 1360 kW from Chinas. Not on 918, where it should have been, with no QRM. Trace of algo talk on LW 207, probably not me, Iceland or mix? 2037 recheck, familiar theme and `Counterspin` starting, a show which deserves explicit regular scheduling.

WOR 2156 also confirmed UT Monday September 19 at 0030 on WRMI 7780, S9/+15 into Boca Ratón SDR I already have running for HWN. I would expect it to be in the awkward skip zone from most Okeechobees.

Also confirmed UT Monday September 19 from 0304 since JL ran over again, S9 on WBCQ Area 51, 6160 - 63 Hz = 6159.937 into Maryland SDR.

Also confirmed UT Tuesday September 20 at 0030 on WRMI 9395, VG S9+20 into Maryland SDR, right after Jeff White intervention, ``Right now the world is in turmoil...`` Is that the Tecsun SW radio ad? Next:

2230 UT Tuesday WRMI 9955 to SSE [jammed by Cuba]
2330 UT Tuesday WRMI 9395 to NNW
1030 UT Wednesday WRMI 5850 to NW
1100 UT Wednesday Unique Radio webcast [5035/3210 USB suspended]
2100 UT Wednesday WBCQ 7490v to WSW
0030 UT Thursday WRMI 9395 to NNW
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2156 monitoring: confirmed Tuesday September 20 at 2230 on WRMI 9955, S9/+10 into Maryland SDR, already vs considerable pulse jamming but listenable past 2250 if you put up with it. Likewise for R. Libertad after 2300, but maybe harsher dentro-Cuba. Next:

2330 UT Tuesday WRMI 9395 to NNW
1030 UT Wednesday WRMI 5850 to NW
1100 UT Wednesday Unique Radio webcast [5035/3210 USB suspended]
2100 UT Wednesday WBCQ 7490v to WSW
0030 UT Thursday WRMI 9395 to NNW
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2156 monitoring: Confirmed Tuesday Sept 20 at 2330 on WRMI 9395, S9/+15 into Maryland SDR, with occasional storm crashes.

``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard's listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees. Dear Glenn: World of Radio, monitoring and confirming the latest for #2156, 9955 kHz, listen creek fm/stream internet. WRMI:

9395, S9 signal, 0030, 0041(45343), 0059, Sep 20 UTC 2022 [Tue]
9395, lots of fading noticed, audio heard fluctuate, 2330, 2344, 2358 (45433), 2359, Sep 20 UTC 2022 [Tue]
5850, 1032 (55433), S9 signal, 1030, Sep 21 UTC 2022 [Wed] (Lemke, Richard -AB) 73's, have a great start to the Fall season, Richard ``

Next:
2100 UT Wednesday WBCQ 7490v to WSW

Or via PayPal, not necessarily in US funds, to woradio at yahoo.com

NEW WOR 2157 should be ready for download early UT Friday September 23, first SWBCs at 0130 on WRMIs 5850 & 7730 (Glenn Hauser, OK, WOR)

** U S A. 7490-, UT Sat Sept 17 from 0000, WBCQ with `AAAWWW`, initial interjexions among WTO, ``gotta pay attention, vote `em out``, but first subject not so political, all about ancient recording methods, i.e. cutting and stamping disc records. He has some old gear to do that. 0004, ``extremely analog here``. CBC somewhere proudly has a brand-new state-of-the-art-totally-digital facility. Says he is in Master Control, guess that means Monticello rather than DeLand of Fla. Angela sounds like she`s remote on a phone. Recheck at 0030, about fun of kit-building. His father used to get him a new Heathkit as soon as school was out in the summer. Missed the rest; did anyone overhear any signif info about station ops? Per twit a few hours earlier, he predicted this would be on 3265 besides the usual 3; could not hear it when I checked it before 0000 (Glenn Hauser, OK, WOR)

** U S A. 9330v, Sept 16 at 1447, yet again the WBCQ SuperStition is off rather than World`s Last Chancing, zero signal into Enid boresight (Glenn Hauser, OK, WOR)

** U S A. 9330v, Sept 17 at 1527, yet again WLCR/WBCQ absent (Glenn Hauser, OK, WOR)

** U S A. 9330.15 approx., Sept 18 at 1508, WLCR/WBCQ English is on at S7/9+10, perhaps a Sunday exception from usual contrary to scheduling silence before and after 15 (Glenn Hauser, OK, WOR)

** U S A. 9330.1v, Monday Sept 19 at 1441 check, WLCR/WBCQ is gone again after a Sunday morning revival (Glenn Hauser, OK, WOR)

** U S A. 7489.9v, Monday Sept 19 at 2338, S9+15, WBCQ, Greek? and/or similar music, certainly no longer `Camp Constitution Radio` far-right politix; fill? Or UBMP? It still shows as 23-24 UT tho it would be a neat trick to run that and CCR at same time 2330-2400 as still on the never-up-to-date program schedule, with all EDT conversion times mislabeled as EST. Did not check at 2300, since last week, the real semi-UBMP repeat had been replaced by a new gospel huxter (Glenn Hauser, OK, WOR)

** U S A. 9330.15v, Sept 21 at 2119, WLCR/WBCQ is OFF also at this daypart; still scheduled to be aiming English right at me. Ivo Ivanov thinx it`s only a 50 kW transmitter, not 500, but how does he know? The last we heard it was the SuperStition 500, off-frequency because it had to be run by an old substitute driver (Glenn Hauser, OK, WOR)

** U S A. 15770, Sept 17 at 1522, NO signal from WRMI-9. Propagation may be degraded but surely at least a trace if on. 15825 WWCR is JBA

carrier, which is normal without Es. 1830 recheck via Maryland SDR, still definitely NO 15770 - a major loss with variety of programming. Nothing about this on disgraced FB. Ops normal otherwise, at 1849 confirmed on into Maryland SDR: 9955, 9455, 9395, and JBA carrier on 21525 (Glenn Hauser, OK, WOR)

** U S A. 15770, Sept 18 at 1435, WRMI-9 is back on but VP after missing yesterday (Glenn Hauser, OK, WOR)

** U S A. 5800, Sept 20 at 0640, S7/S9 of dead air, must be WRMI, but #10 is now scheduled to quit 5800 at 0400, while #4 is also labeled 5800 but 24/7 of blank. Running 100 kW units after hours must be bad for the power bill, or maybe there is some reason for testing (Glenn Hauser, OK, WOR)

** U S A. 5800, Sept 21 at 0608, WRMI is ON with TOMBS, S9+20 // 5850 but 5950 is off. 5800 had been cut back until 0400* but last night was heard after 0600 with dead air. Maybe something to do with cash flow from TOMBS? Skedgrid still dated Sept 9 still shows it only until 0400* with otherstuff (Glenn Hauser, OK, WOR)

** U S A. 5970, Sept 18 at 0639, RCM, WEWN still silent. Steven Luce replied Sept. 16: ``Glenn, regarding WEWN on 5970: I did several checks between 12 and 14 UT September 16, and it appears they are on 5970 continuously during that time span. Carrier cut at 1356; quickly retuned to 12050 and found the IS already going. Nothing from WEWN on 5970 at a check just before 1100. I have not been hearing WEWN on 5970 during checks around 0300. I did hear them signing on at 0000 a couple of weeks ago; might be worth checking 5970 during the 00 to 03 time span to see if they have kept some of the evening schedule on SW. Stephen Luce, Houston, Texas`` (Glenn Hauser, OK, WOR)

** U S A. 5970, Sept 21 at 0609, WEWN Spanish still OFF (Glenn Hauser, OK, WOR)

** U S A [non]. 15610, Sept 18 at 1437, S9 of Arabish? talk = high noise level. This was once all-day English frequency of WEWN, then reduced not to start before 1900 as still in HFCC Sept 18; then gone completely. Listed now at 14-15 is VOA Kurdish via BOTSWANA this hour only (Glenn Hauser, OK, WOR)

** U S A. 4840, Sept 21 at 0612, WWCR S9+30 of dead air with some hum. There they go again. Since 3215 & 5890 are off overnight weekdays, leaves only 5935 on air and modulating, with DGS, tsk2 (Glenn Hauser, OK, WOR)

** U S A. 1540.24 approx., Sept 20 at 0000 UT, het to 1540 stations. Bet it`s WKVQ, Eatonton, Georgia, still/again way off frequency as I

was often hearing it last year, even all-night; and just reported again by several, ranging 1540.241 to .247:
https://groups.io/g/mwoffsets/topic/93742683#673
Here it seems to have gone off shortly after tune-in. FCC AM Query is erroring out, but looks as if official sunset in September should be 2345 (Glenn Hauser, OK, WOR)

** VANUATU. 7932+, still Sept 15 at 0625, S5/S7 music from R. Vanuatu, 2 x 3966+; but nothing on X 3 = 11898+ (Glenn Hauser, OK, WOR)

** VANUATU. 7932+, Sept 16 at 0620, R. Vanuatu, music, S5 vs CODAR swirshes peaking S8. Could not stay awake past 0700 to check 8620 and the other set of frequencies, but Ron Howard reports from California:

``8620+, Radio Vanuatu, 0858+ UT. ID and local time ("8 o'clock"); into monologue in Bislama. Checking from 0940+, found RV had gone off the air; no signal heard on any of the past or current frequencies!`` (Glenn Hauser, OK, WOR)

** VANUATU. 7932 & 8620 & 7890, Sept 17 at 0644, NO R. Vanuatu on previously or recently employed second harmonix. Gary Pence agrees, after Ron Howard found 8620+ disappeared during Sept 16. But now we need to do exhaustive continuous band searches before and after 0700 in case it have jumped to a totally new constellation (Glenn Hauser, OK, WOR)

** VANUATU. 7932+, Sept 18 at 0636, still no signal from R. Vanuatu. In the continuing absence of RV, note that a fundamental long registered in HFCC but unused, is 2485, 10 kW at 10-19 UT. Some very interesting possible harmonix of that, worth checking even before 1000: 4970, 7455, 9940, 12425, 14910, 17395 ...

Ron Howard reported: ``VANUATU[non-log]. 8620+, Radio Vanuatu, checking 0830+ UT, no signal heard on any of the past or current frequencies! We can only hope that they are working now on repairing the xmtr! Yesterday (16th) I did some extensive scanning of various frequencies after 0940+, when I found they were off the air, thinking perhaps they had jumped to another frequency, but did not find them!`` (Glenn Hauser, OK, WOR)

** VANUATU. Re RV registered 2485, thus possible harmonix, Ron Howard replies: ``Hi Glenn - Regularly I do check 2485, as I have heard RV there in the past, but certainly not heard recently. 2020 audio is at
https://app.box.com/s/9cn4yyt71n1meom6e6ivfha8olqh7626
Ron (California)`` 1015-1018+ UT March 5, vs HNL.

7890, 7932, still unheard Sept 19 circa 0635, nor 8620 at 0705 (Glenn Hauser, OK, WOR)

** VANUATU. 7932+, Sept 20 circa 0630 quick check for R. Vanuatu still finds nothing: need to be more persistent like Ron Howard, same date:

``Strange happenings! On 7932, happen to hear Radio Vanuatu for maybe 10-15 seconds before cutting off at about 0522 UT. Seemed they were maybe working on repairing the xmtr without attempting to correct the situation of being off frequency? Went to randomly check 8620+, after 0559 UT; yes, at about 0653 they came on with Island music for maybe another 10-15 seconds; checked after 0653 for a straight hour, but they never came back at all. Today heard for probably less than 30 seconds! Ron, Asilomar State Beach, Calif. (near Monterey), Etón E1, external antenna: 100 ft. long wire`` (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search, Sept 21 at 0617+, first time in months such a panoply this late due to latening Euro sunrises: checked 1044 first and there it is, far too late for Ethiopia as I recently hypothesized circa 0300.

But this is still too early for any TPs beyond 846, and unusually, Kiritimati is missing even tho it`s Wednesday, not Sunday. Gary Pence agrees, Sept 21: ``846 kHz no show --- sure enough, I tried checking early and thru the nite but it was a no show. NH6XO [SDR Hawaii] is a great place to check since Kiritimati is 1353 miles almost due south, where his antenna is north/south 220 ft unterminated Beverage. 73s and good luck this morning, Gary``

In total, not in the order tuned; (2) indicates at least two carriers beating; (3) at least three: 531, 558, 621, 639, 684, 693-, 729(2), 774(3), 847, 855(2), 1044, 1098(2), 1107, 1116, 1305; 1710 = NAm pirate? Method is 9 kHz steps in USB at 1 kHz below the channels.

These are likely from Spain/Algeria/Morocco; even when some of the Spaniards are lower powered than biggies insolated further east. 693 is perceptibly low, judging from pitch tuned to 692 USB. MWOffsets shows the only one fitting, as of 8 years ago! ``692.9921 RNE Radio Nacional (Tortosa/Santa Bárbara) 24h 2014-08-23`` (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 650, Sept 16 at 0638 UT, WSM with music, but considerable QRM from something else, unusual. Suspect some other US station like KGAB out of whack at night, but clear at next check a few minutes later (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 7879.577v, Sept 19 at 0634 open carrier, maybe Vanuatu I am looking for, not on ex-7890? No, soon goes into utebeeps, switch to 7880.42 or so (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9172.8 USB, Sept 18 at 0643, JBA 2-way in Spanish (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9700, Sept 16 at 2350, S9+20/30 of open carrier/dead air; something warming up for *0000? Nothing sked then per Aoki but RRI Spanish from Tsiganeshti is supposed to be here until 2357*. And would you believe RHC English at 0100-0700 on 9700? Aoki and EiBi both do! Never seen reported lately but will have to check for it (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 12025, Sept 16 at 1445, S7/S9 open carrier. Only listee in EiBi & Aoki at 14-15 is CRI Chinese via Urumqi Hutu, EAST TURKISTAN, land of imperialist Chinese genocide against Uyghurs and other Moslems. Or maybe a closer ute? Or BBC warming up Singapore for 1500+ English? (Glenn Hauser, OK, WOR)
